

Mitsubishi Chemical Infratec Co.,Ltd.
1-1, Marunouchi 1-Chome, Chiyoda-ku, Tokyo 100-8251, Japan

Mitsubishi Chemical Infratec Co.,Ltd. (MCIT; Head office: Tokyo, Japan; President and CEO: Katsuya Serizawa), a member of the Mitsubishi Chemical Group (the MCG Group), is pleased to announce it has entered into a licensing agreement with AG Metal Industries L.L.C. (AGMI; Head office: Ras Al Khaimah, UAE) for the provision of production technology in UAE for Aluminium Composite Materials (ACM) called ALPOLIC. AG Metal Industries is a factory built by Al Ghurair in the UAE, with whom MCIT has maintained a strong relationship, proven through doing business together for many decades.

ALPOLIC is composed of two skins of aluminum and the fire-retardant core that is certified for fire regulations in many countries. It has been widely used in Japan and across the world for over 50 years. ALPOLIC with fire retardant core and applications are applied to exteriors such as building façade, roof coverings for new buildings and retrofit applications, as well as for interior decorations. The versatile and unique technology achieves outstanding durability with a high degree of safety.

UAE has strong demand for ACM, one of the most popular façade materials due to its lightweight, weather-resistant, high insulation performance, and its ease in fabrication and installation when compared to other materials. Its versatility makes it perfect for all types of buildings.

The MCG has production sites in three countries, Japan, USA and Germany. UAE will be the first and only country to operate by outside of Mitsubishi Chemical Group companies. In addition, the Group is exploring consideration for the provision of licenses and the outsourcing of production to accelerate growth for the emerging construction market in UAE.

MCIT plans to provide support for a new AGMI factory that can better respond to strong market demands, achieving high quality and fire-safe ACM built on its long experience in quality control technologies.

[Overview of AGMI]

Location: Ras Al Khaimah, UAE

Establishment: 2022

Business Activity: Insulated Metal Plates Manufacturing & Non-Metallic coating of

MetalsCorporate
